Welcome to the *Scientific Archives of Dental Sciences*, a distinguished platform dedicated to advancing dental science, promoting oral health, and fostering innovation in dental research and practice. As we embark on this journey of exploration and discovery, it is imperative to acknowledge the pivotal role that dental science plays in enhancing the overall well-being of individuals and communities worldwide.

Dental science is a multidisciplinary field that intersects with various disciplines such as biology, medicine, engineering, and public health. Our journal embraces interdisciplinary collaboration, encouraging researchers, clinicians, educators, and industry experts to come together to address complex challenges and propel the field of dentistry forward.

We are committed to publishing high-quality, peer-reviewed research encompassing a wide array of topics, including dental materials and technology, oral biology and pathology, clinical dentistry, public health dentistry, and dental education and training. Our goal is to disseminate cutting-edge research and innovations that improve treatment outcomes, patient experiences, and population-level oral health.

Oral health is an integral component of overall health and well-being. Our journal is dedicated to addressing global oral health challenges, including dental caries, periodontal diseases, oral cancer, and disparities in access to dental care. Through collaborative research and knowledge sharing, we strive to develop effective strategies for prevention, diagnosis, and treatment of oral diseases on a global scale.

Ethical practice and patient-centered care are fundamental principles in dentistry. We emphasize the importance of ethical conduct, patient rights, informed consent, and compassionate care in all aspects of dental research and clinical practice. Upholding these principles ensures the trust and well-being of patients and

promotes a positive impact on oral health outcomes.

The *Scientific Archives of Dental Sciences* also serves as a valuable resource for dental students, educators, and practitioners. We offer educational articles, expert opinions, and updates on the latest advancements in dental science to support continuous learning and professional growth within the dental community.

We invite researchers, educators, clinicians, and industry professionals to contribute their expertise, insights, and innovative ideas to the *Scientific Archives of Dental Sciences*. Together, we can advance dental science, improve oral health outcomes, and make a positive impact on the lives of individuals and communities globally.

Thank you for your dedication to advancing dental science and promoting oral health. We look forward to your valuable contributions to our journal.
